# Executive Summary

[ANALYSIS] Security Status: CRITICAL (7.4/100)

Detected 1 security threat(s). Most common: Brute Force Attack (1 occurrence(s)). [WARNING]  
Immediate attention recommended.

## Security Overview

Metric	Value
Total Threats Detected	1
Security Score	7.4/100
Health Status	CRITICAL
Logs Analyzed	101
Compression Ratio	0.0%
Cost Savings	\$0.00

## Detected Threats

### 1. Brute Force Attack

Severity	HIGH
Risk Score	92.6/100
Confidence	95%
Description	Multiple failed login attempts detected (7 occurrences)
Affected Resources	45.142.212.88, 192.168.1.50, root
Source IP	45.142.212.88
Location	Moldova

## IP Threat Intelligence

Analyzed 1 unique IP addresses. Found 1 malicious IPs.

IP Address	Country	Threat Level	Types
45.142.212.88	Moldova	LOW	Potential VPN/Proxy

## **Recommendations**

- Review and address all CRITICAL and HIGH severity threats immediately
- Implement recommended security controls for each threat type
- Monitor suspicious IP addresses and consider blocking repeat offenders
- Enable additional logging for affected resources
- Schedule follow-up security assessment within 7 days
- Update incident response procedures based on findings
